Days to wait before claiming: 10

Days before subsequent claim: 90

The default Chronology comes from the frequency code in the fixed field of the bibliographic record as demonstrated below. If the default Chronology does not match the frequency of the publication in hand, then the bibliographic record frequency is incorrect. This mismatch of frequency and Chronology type can result in the generation of error messages when issues are predicted.

If needed, contact the WYLD Office to have the frequency on the bibliographic record changed.
